

The Village of Glenview Report

glenview.il.us

May 2015

Water meter replacement to get started

Beginning next month, the Village of Glenview will start the process of replacing or retrofitting all 16,000 residential and commercial water meters within Glenview with new automated meters. Besides replacing aging units, the new meters will use new technology to identify water usage regularly and accurately. The new meters will allow the Village to provide better customer service and more details on water usage.

The new meters will automatically transmit readings wirelessly, eliminating the need to manually read each meter. This way, the Village can be more efficient and reduce water system costs by preventing manual meter errors and eliminating the time-consuming manual meter reading process.

Sometime over the next 14 months – through summer 2016 – each Glenview water customer will be contacted to set up

an appointment to receive a new water meter.

The Village has awarded a contract to Siemens Industries to perform this meter replacement. Siemens will need access to each home and business in Glenview to replace the meter. Siemens will work with each household to arrange a convenient appointment to complete this task.

Homeowners are asked to give installers adequate clearance around the current water meter, which might be located in a basement, crawl space or utility closet.

There is no charge for participating in this mandatory program. Under normal circumstances, the replacement will take about 30 minutes, during which time the water will be shut off.

Read the “Frequently Asked Questions” below for more.

Why is Glenview replacing water meters?

Water meters across the Village are approaching or beyond the manufacturer’s recommended life span of 20 years. As the current mechanical water meters age, they may slow down and their accuracy in registering water consumption decreases. The new water meters will also achieve technological and customer service benefits.

Where is my water meter?

Most water meters are located inside the house or business, and might be in a

basement, crawl space or utility closet.

Am I required to participate?

Yes, participation in this program is mandatory. All meters in the Village, both at homes and businesses, will be replaced over the course of 14 months. Your cooperation in scheduling an appointment after you receive a notification letter is appreciated.

How will I be contacted?

When the installers are in your area, you will receive a letter in the mail from the Village and Siemens to make an appointment, followed by reminder postcards, if necessary, and a door hanger if an appointment has not been scheduled.

How does the system work?

The water usage data from each meter will be transmitted wirelessly by a radio signal to the Village.

Will anything be on the outside of my building?

Yes. There will be a box (also called a transmitter) on the outside of your home. It will be located in or around the same area that your current water meter remote is located. The installer will attempt to reuse the hardware that is currently on your home or business.

How often will the new meter transmit my data?

The meter will transmit a signal approx-

MEMORIAL DAY OBSERVED

Village Hall will be closed on Monday, May 25, in observance of Memorial Day. See parade information on page 5.

Energy-saving ideas

Here are just a few simple things you can do to improve the energy efficiency and comfort of your home as temperatures warm, according to the U.S. Department of Energy:

- **Service your air conditioner.** Easy maintenance such as routinely replacing or cleaning air filters can lower your cooling system's energy consumption by up to 15 percent.
- **Open windows.** Opening windows creates a cross-wise breeze, which allows you to naturally cool your home without switching on air conditioners.
- **Use ceiling fans.** Cooling your home with ceiling fans will allow you to raise your thermostat four degrees.
- **Cook outside.** Keep the heat out of your home by using an outdoor grill instead of indoor ovens.
- **Install window treatments.** Energy-efficient window treatments of coverings, such as blinds, shades and films, can slash heat gain when temperatures rise.
- **Caulk air leaks.** Using low-cost caulk to seal cracks and openings in your home keeps warm air out.
- **Bring in sunlight.** During daylight hours, switch off artificial lights and use windows and skylights to brighten your home.
- **Set the thermostat.** On warm days, setting a programmable thermostat to a higher setting when you are not at home can help reduce your energy costs by approximately 10 percent.
- **Seal ducts.** Air loss through ducts can lead to high electricity costs, accounting for nearly 30 percent of a cooling system's energy consumption.
- **Switch on bathroom fans.** Bathroom fans suck out heat and humidity from your home, improving comfort.

Recycle latex paint

Latex paint is not a hazardous material, and can be discarded in the trash after it's been hardened. In a protected and well-ventilated area, away from children and pets, remove the lid and allow paint to naturally dry out over a period of time. This method works best if the can is less than one-quarter full. For fuller cans, mix shredded newspaper, kitty litter or a hardware store-bought waste paint hardener to the paint can and allow it to absorb and dry out over a period of time.

If you would rather recycle the paint, some hardware stores in the area will accept it for a small fee, including Glenview Ace Hardware, 1560 Waukegan Road, Glenview; Millen Do It Best, 1219 Wilmette Avenue, Wilmette; and Skokie Ace Hardware, 5035 Oakton St., Skokie.

Here are the May notifications of major speed radar "hot spots" and stop sign/traffic light enforcement. At these locations, chosen in part based on resident requests for selective enforcement, Glenview police officers this month will monitor the areas for recurring traffic violations on an as-available basis. The goal is to promote safe driving in Glenview. Selective enforcement request forms can be found on our website at www.glenview.il.us.

Radar "hot spots"

Greenwood Road from Glenview Road to East Lake Avenue • Sherwood Road • Arbor Lane • Winnetka Road from Greenwood to Pflingsten Road • Woodlawn Road from Waukegan Road to Sunset Ridge Road • Dewes Street from Harlem Avenue to Shermer Road • Glenview Road from Pflingsten Road to Milwaukee Avenue • Harrison Street from Waukegan Road to Shermer Road

Stop sign/traffic light enforcement

Huber Lane/Linneman Street • Winnetka Road/Greenwood Road • Beech Drive/Sherwood Road • Greenwood Road/Happy Hollow Road

This month in history

60 years ago – May 2, 1955

Calling Glenview Road a hazard to traffic badly in need of repairs, the Village Board of Trustees petitioned the state of Illinois, which then had authority for the roadway, to resurface it.

55 years ago – May 16, 1960

The Village Board of Trustees amended the Municipal Code to restrict the unauthorized opening of any sewer or manhole.

30 years ago – May 6, 1985

The Village Board of Trustees imposed a hotel and motel tax of 5 percent on room rentals.

25 years ago – May 1, 1990

The 911 emergency telephone system was established in Glenview, with a \$1 per month surcharge set per network connection. The action implemented the referendum passed in November 1989.

Water meter FAQs *from page 1*

imately five times a day. Each transmission lasts no longer than 15 seconds.

Is this new system safe?

Yes, the power and duration of the radio signal is too low to pose a health risk. The products that make up the system are evaluated for safety and are below levels specified by the Federal Communications Commission.

Is my meter data secure?

Yes, only meter consumption readings and meter identification numbers are transmitted. Personal customer information is not transmitted.

Does the meter interfere with other electronics?

No, the technology operates as a very low-powered signal that is regulated by the FCC to eliminate interference. It will not interfere with the operation of other electronic services such as telephone, television, garage door openers, pacemakers or baby monitors.

Does the transmitter run on my home electricity?

No, the transmitters run on batteries with a 20-year life span.

Do I have to be at my home or business during the appointment?

Yes, because meters are located inside buildings, a person 18 years of age or older must be present throughout the entire appointment.

Who will be replacing my meter?

The Village has contracted with Siemens Industries. Installers will have a marked vehicle, a Village identification badge and a letter from the Village. They will not ask for any personal information or for you to pay any money. If you have concerns whether someone is acting in an official capacity, please dial 911.

Will I have to sign anything?

The installer will have a form to write down the new meter's serial number and final read of the old meter. You will be asked to sign it before the installer leaves.

Will I ever receive a bill with an estimated reading again?

The new system will virtually eliminate estimated readings.

For more information and updates, refer to the website at glenview.il.us/Page/watermeterreplacement.aspx.

From the Village President

You know the old saying about there being two seasons in the Midwest: winter and road construction. Because the window of time to get streets and roadways reconstructed or repaired is small, the dreaded orange cones go up and lanes are blocked off as soon as weather permits.

We're already well into road construction season in and around Glenview. I want to extend my thanks for your patience now and over the next several months – to motorists for being respectful of each other and vigilant about changing traffic patterns and to residents whose neighborhoods experience cut-through traffic and noise.

Here's a summary of the major road projects that are going on:

- The east leg of the intersection of Harms Road and Glenview Road is closed to traffic until early June. Harms Road north of Glenview to Wilmette Avenue is closed in both directions until mid-September. The closures are necessary to facilitate the East of Harms Regional Stormwater project, which will help ease flooding for 1,150 homes in the neighborhood.
- The Illinois Department of Transportation is resurfacing Milwaukee Avenue from Glenview Road south to south of Touhy Avenue, with mainly daytime closures. IDOT is also resurfacing Golf Road from west of Potter Road to Lincoln Avenue, and will have one lane closed in both directions for the three-mile stretch. Both these resurfacing projects are expected to be completed by the end of August.
- Additionally, IDOT plans to repair bridge joints on the Union Pacific Railroad overpass on Milwaukee Avenue north of Glenview Road. Motorists should expect daytime lane closures until the project is completed in August.
- IDOT is also working to complete the widening of Willow Road from Waukegan Road to the Edens Expressway, a massive project that began in 2013. Estimated completion is the end of this summer.

A number of websites and blogs have been established to provide updated information on the progress of these projects:

- A list of Village of Glenview road projects is available at glenview.il.us/Pages/ConstructionProjects.aspx. Blogs for each project can be accessed there as well, including IDOT's Willow Road widening project.
- Construction news releases from the Illinois Department of Transportation can be found online at idot.illinois.gov/about-idot/stay-connected/news-releases/Construction/releases.
- The Transportation Management Association of Lake Cook provides overviews of projects being done by IDOT, Cook County Department of Transportation and Highways, Lake County Division of Transportation and Illinois Tollway on its website -- tmalakecook.org/tma-highway-construction-meeting.
- If you're planning to travel outside the Chicago area, another resource is travelmidwest.com, which displays a map that allows scrolling and zooming to particular areas of interest.

The investment in our infrastructure requires a great deal of coordination, effort and time to complete. While it may cause some inconvenience now, the work will result in storm sewers large enough to help prevent flooding and miles of improved roadways.

A handwritten signature in black ink that reads "Jim Patterson". The signature is written in a cursive, flowing style.

Bike Glenview: Good things happen when you pedal

Are you ready to get into gear for National Bike Month? We're revving up "Bike Glenview" to help. This community-wide initiative promotes biking as a healthy, cost-effective and low-polluting way to explore our Village. The campaign is a cooperative effort of the Village of Glenview, Glenview Natural Resources Commission, Glenview Park District, Glenview Public Library and Glenview Chamber of Commerce.

Biking is one of the easiest ways to exercise. It builds strength, muscle tone and stamina; improves cardiovascular fitness; and eats up calories.

Biking also helps the community's health, by reducing traffic congestion, air and noise pollution and greenhouse gas emissions. Plus, riders get to places faster.

On our collective website – bikeglenview.com – are instructive videos on bike basics; a list of 2015 "Bike Glenview" events; and access to our bike trail and green infrastructure tour maps. Paper copies and bike helmet stickers are available at Glenview Village Hall, 1225 Waukegan Road; Glenview Public Library, 1930 Glenview Road; and Glenview Park District facilities.

Pick up a bike-themed book list at the Glenview Public Library. Bikers can make an impromptu visit by checking out one of four bike locks for up to two hours.

These activities can get you out and pedaling around town:

• **StoryWalk Presents** – Walk, skip, jog, or better yet, bike along the path at Little Bear Garden at Gallery Park, 2001 Patriot Boulevard to read about:

"Yummy Yummy! Food for My Tummy!" By Sam Lloyd
Two monkeys living on neighboring islands try to find a way to get together despite the sharks in the water. Through Sunday, May 24
"Pete the Cat and the New Guy" by Kimberly and James Dean
Sunday, June 14 through Sunday, August 2

• **Bike to Park Center this month**

Ride your bike to Park Center, 2400 Chestnut Avenue, and show your bike helmet to the front desk staff to receive a free water bottle, Bike Glenview map and sticker. May 1-31

• **National Bike to School Day** (walkbiketoschool.org) – Wednesday, May 6

• **National Bike to Work Week** (bikeleague.org) – May 11-15

• **Get Out & Go Treasure Hunt**

Ride your bike from Gallery Park to Fuller Air Station Prairie and search for clues along the way. Earn points for answering questions about your discoveries.
11 a.m. to 3 p.m. Sunday, June 7. Start at Park Center, 2400 Chestnut Avenue

• **Children's Bike Parade**

11:15 a.m. Saturday, July 4, as part of Glenview's 4th of July celebration

• **"Bike Glenview!" at Farmer's Market Green Table**

Learn about the Bike Glenview initiative and bring an old bike to recycle
9 a.m. to noon Saturday, July 25, at Wagner Farm

• **A Bicycle Built for One: Bike History 1818-1930s**

Bike historian Carey Williams brings his collection of antique bikes to the Glenview Public Library, 1930 Glenview Road. 7 p.m. Tuesday, July 28.

We're out and about

Warmer weather brings more residents outside, so it becomes everyone's duty to keep neighborhoods safe, clean and orderly:

- Properly trim back any excessive landscape growth abutting public sidewalks, so that sidewalks aren't blocked by bushes, shrubs and trees. Pedestrians – especially children – should not have to walk in the street.
- Regularly mow and maintain your lawn and public parkways. Weeds and grass cannot grow taller than eight inches.
- When driving, look out for pedestrians. Slow down and be prepared to stop when turning or entering a crosswalk. Use added caution to look out for children.
- Be aware that the speed limit on residential streets in Glenview is 20 mph. The greater the speed, the longer it takes to stop a vehicle by braking, which places pedestrians at greater risk.

We remember

Honor the memory of all who served in wars fought by American forces at the 2015 Memorial Day Parade and Ceremony on Monday, May 25. This year's parade begins at 9 a.m. at Depot and Grove streets, heading east to Pine Street, then south to Glenview Road and east to the Veterans Memorial at River Drive, where the ceremony will take place.

Speakers include Village President Jim Patterson and William Bickley, Commander of Joseph M. Sesterhenn American Legion Post 166. Also participating are the Glenview Fire Department and Post 166 Color Guards. Post 166 member Allen Andreasen is this year's Parade Marshal.

Congratulations to the CHARACTER COUNTS! in Glenview 2015 Essay Contest winners

Fifth Grade

1st Place: Madison Konopka, Wescott School
2nd Place: Patricia Corasis, Willowbrook School
3rd Place: Olivia Trela, Wescott School

Sixth Grade

1st Place: Drew Ornduff, Springman Middle School
2nd Place: Gabriela Fuja, Springman Middle School
3rd Place: Matthew Jachtorowycz, Our Lady of Perpetual Help School

Seventh Grade

1st Place: Maddie Licata, Maple School
2nd Place: Haley Ferrone, Attea Middle School
3rd Place: Katie Katranis, Maple School

Eighth Grade

1st Place: Shea Graf, Our Lady of Perpetual Help School
2nd Place: Joshua Yang, Maple School
3rd Place: Adam Alwan, Springman Middle School

The winners were honored at the April 21 Village Board of Trustees meeting. Awards and support were provided by: Northview Bank & Trust, American Chartered Bank, Glenview Optimists and Image Specialties.

23rd annual Chicago River Day

On Chicago River Day, Saturday, May 9, thousands of volunteers gather for a day of hands-on environmental work throughout the Chicago River system, working side by side to collect garbage and sort for recycling, remove invasive vegetation, spruce up river-edge trails and plant native seedlings.

Join the Village of Glenview's Natural Resources Commission to beautify the West Fork of the North Branch of the Chicago River by picking up trash and pulling garlic mustard in and around the Techny Basin. Meet at the Kohl's parking lot off Willow Road at 9 a.m. to work through noon Saturday, May 9. Volunteers receive a free T-shirt. Work gloves, tools and trash bags will be provided. Call (847) 729-2329 for more information.

Routing invasive plants starts with vigilance

Our green spaces and backyards are being invaded. The intruders are interloping plant species from other lands that can cause environmental damage.

During the last several decades, new plants have appeared which have quickly become pests. They aggressively crowd out many native wildflowers and gain an ecological edge that impacts natural landscapes, including woodlands, savannas, prairies and wetlands.

Once invasive plants become established, they can grow and spread rapidly, often because they have no natural predators in their new environment.

The Village of Glenview's Natural Resources Commission has launched a campaign to try to get these invasive species under control. Landowners and residents can assist in the battle by learning to recognize non-native plants, eliminate them from the outset and not plant them or encourage their growth.

Here are just a few of the invasive plants that can be easily found in the Glenview area:

Purple loosestrife

— Long a prized perennial because of its pinkish-purple flowers, purple loosestrife grows in dense stands and seeds are easily spread. Because it resprouts from root fragments, it is aggressive and can't be easily removed by hand. Purple loosestrife overtakes wetlands and stream beds.

Buckthorn

— This European species forms thickets which are almost impenetrable. It can be recognized by its fine-toothed, opposite leaves and dark, berry-like fruits.

Canada thistle — A serious invader in fields and pastures, Canada thistle is difficult to eradicate. A small patch

Phragmites — Also known as a common reed, this wetland grass can grow to 15 feet in height and create tall, dense stands that crowd out native plants.

Teasel — This plant grows a basal rosette, then sends up a tall flowering stalk. A single teasel plant can produce over 2,000 seeds that can remain viable for at least two years. The tap root may be more than 2 feet in length.

Garlic mustard

— This noxious plant spreads through woodlands and primarily shaded urban areas by seeds. Small white four-petaled flowers bloom in spring, and when a leaf is crushed or the stem of the plant is broken, a strong onion-like smell is evident. Garlic mustard takes over parks, yards, nature preserves and other natural habitats.

can soon turn into a large colony if left unchecked. This robust plant grows to 5-foot-tall and the stem and leaves are covered with prickly spines.

May is Illinois Invasive Species Awareness Month

• Glenview Television (GTV) has produced five short videos each showing an invasive plant species and suggested control methods. Access the videos at: glenview.il.us/Pages/invasiveplants.aspx

• Attend a discussion on native and non-native plant species at 7 p.m. Tuesday, May 19, at the Glenview Public Library, 1930 Glenview Road, featuring Robyn Flakne, the Village of Glenview's Natural Resources Manager, and Judy Ksiazek, the Glenview Park District's Environmental Education Supervisor.

• Check out the Illinois Invasive Species Awareness Month website at invasive.org/Illinois for information on educational events, volunteer activities and other resources.

• Visit these websites for more information:

- Illinois Audubon Society — Illinoisaudubon.org
- Illinois Native Plant Society — Ill-inps.org
- Northeast Illinois Invasive Plant Partnership — Niipp.net
- Midwest Invasive Plant Network — Mipn.org

thrive on private properties or continue to be planted by gardeners.

What can you do?

- Learn to identify the different invasive species in the area.
- Plant native species in your garden and landscaping, which are well adapted for life in Illinois and will not require the additional care of many non-native plants.
- Keep an eye out for invasive species on your property and neighborhood. Act to eliminate them before they become a problem.

Village Board in brief

The Village Board of Trustees met April 7 and 21. Here is a summary of actions taken:

◆ Amended the Glenview Municipal Code to increase the number of Class B liquor licenses from 15 to 18; and authorized execution of a Class B liquor license for Middy Mags Pizzeria, 1127 Depot St., which allows for the sale of beer and wine for consumption on the premises where food is served.

◆ Appointed Neda Brisport to the Appearance Commission.

◆ Approved an ordinance establishing a “no parking” zone on a portion of Old Willow Road.

◆ Authorized a bid award to J.A. Johnson Paving Co. of Arlington Heights for the fiscal year 2015 road resurfacing and Minor Area Repair Strategy (MARS) program for \$1.27 million.

◆ Authorized a bid award to ALamp Concrete Contractors Inc. of Schaumburg for the Knight Street/Crown Lane and Linneman Street water main replacement projects for a total \$1,427,502. The improvements include water main, storm sewer and pavement work.

◆ Authorized a bid award to Sheridan Plumbing and Sewer Inc. of Bedford Park for the Wagner Road water main lining project for \$1,403,209. The improvements include lining and replacing the water mains between Glenview Road and East Lake Avenue. Construction is expected to start in mid-August.

◆ Authorized extending for one year

the contract with Schroeder & Schroeder Inc. of Skokie for \$123,000 for concrete pavement repair services.

◆ Entered into an agreement to secure Community Development Block Grant (CDBG) Disaster Recovery grant funds to facilitate the East of Harms Regional Stormwater project and reconstruction of Harms Road. The project will help prevent the Main Stem (Middle Fork) of the North Branch of the Chicago River from backing up into local Glenview sewers and will allow stormwater to be pumped from the local storm sewer system into the river.

◆ Modified the hours for the sale of beer or wine by a Class J Liquor License holder to 2-10 p.m. from 4-9 p.m.

◆ Amended the Glenview Municipal Code to establish a Class F-4 liquor license classification, which would regulate services of alcoholic beverages in a movie theater.; and authorized execution of a Class F-4 Liquor License for Pacific Theatres Exhibition Corp., dba ArcLight Cinemas, 1850 Tower Drive.

◆ Approved an ordinance for conditional use for Sport Car Chicago at 3031 North Lake Terrace, to allow for the operation of an automotive sales use, a B-3 General Service District use, in an I-2 Light Industrial District.

◆ Authorized execution of a professional service contract with Matrix Design Group Inc. of Colorado Springs for

The Village of Glenview is seeking interested residents to serve on the Comprehensive Plan Committee. This committee will work with the consultant recently hired by the Village Board of Trustees and Village staff to update the Comprehensive Plan – the road map that guides local development and policy decisions regarding future growth, preservation and change in Glenview for the next 10 to 20 years.

Read more about the process online at glenview.il.us/business/Pages/Comprehensive-Plan.aspx. An application link is available on that page.

up to \$200,000 to provide planning and design consultation during the 2016 Comprehensive Plan update.

◆ Established two-hour parking along Glenview Road between East Railroad Avenue and Church Street, which matches other retail parking guidelines in the downtown area aimed at discouraging Metra commuter parking and encouraging customer parking turnover.

For more, go online to: glenview.il.us and click on Government/Board of Trustees/Meeting Reports.

Electric aggregation price set for a fourth year

Electrical aggregation, permitted by state statute, enables municipalities to seek alternate suppliers of electricity in an effort to lower electric supply rates for residents. For a fourth year, the Village of Glenview has entered into a contract with MC Squared Energy Services for an electric supply rate of 6.880 cents per kilowatt-hour, in effect from June 2015 through May 2016.

While this is a rate increase from the current third-year price of 6.719 cents per kilowatt-hour, the new price is projected to continue to provide savings compared with ComEd's rates of about 5 percent.

Residents should have received a letter from the Village of Glenview and MC Squared that clearly defines the rate for the

coming 12-month period. Residents will not be contacted by MC Squared via phone or door-to-door sales as part of this process.

The Village Board of Trustees in November 2012 voted to join the LakeShore Power Alliance consortium with the village of Wilmette, Northfield and Kenilworth for the electric aggregation program. Enrollment was automatic if you were a resident of Glenview in December 2012.

The delivery of electricity is still provided by ComEd. Your ComEd bill will state MC Squared Services as the supplier.

For more information, go online to glenview.il.us/Pages/Electric-Aggregation-Program.aspx.
