

SUBJECT: Stormwater Funding Workshop

AGENDA ITEM: Board Workshop

MEETING DATE: July 17, 2012

VILLAGE BOARD REPORT

TO: Village President and Board of Trustees

FROM: Joe Kenney, PE, Director of Capital Projects/Inspectional Services (847) 904-4313
Drew Mayes, PE, Senior Civil Engineer (847) 904-4410

THROUGH: Todd Hileman, Village Manager

PURPOSE:

Staff would like to provide the Village Board with an update regarding potential methods of stormwater-only funding, one of the seven key components of the Village's approved stormwater master plan.

BACKGROUND/DISCUSSION:

In August 2010, the Village Board adopted a stormwater master plan entitled the *Flood Risk Reduction Program* (the "Program"). The Program, which can be found in its entirety on the Village's website at: <http://www.glenview.il.us/capital/swtaskforce/SitePages/index.aspx>, outlined seven key components required to improve Village-wide stormwater drainage. One of the seven components was examination of funding mechanisms for new stormwater projects and for maintenance of existing stormwater infrastructure.

The Program recommended studying the feasibility of a Stormwater Utility Fee ("SWUF") as a means of funding for these projects. As part of the Workshop, staff is looking to provide the Village Board with a list of potential long-term stormwater funding opportunities and address, or follow-up, on any questions or concerns.

Staff is seeking input regarding these funding options in advance of the 2013 Budget Meetings.
